Introducing Git

From the official Git [website](#):

*Git is a **free and open source** distributed version control system...*

But what does that mean in practice? Git...

- ▶ Lets you “look at” a file at a previous point in time
- ▶ Allows multiple people to work on the same codebase at a time
- ▶ Lets you experiment with your code (and keep the original copy safe)

Introducing GitHub

- ▶ Sort of a combination of Dropbox and Twitter
- ▶ Better to show, than tell...

the
cloud

my
computer

Tour of GitHub

- ▶ Create GitHub account
- ▶ Explore “home” view
- ▶ Show “profile” view
- ▶ Create a “profile README”
- ▶ Show small repository:
[fox-projects/xdgbasedirectoriespecification.com](https://github.com/fox-project/xdgbasedirectoriespecification.com)
- ▶ Show large repository: [xournalpp/xournalpp](https://github.com/xournalpp/xournalpp)
